PROFILE

Recent B.C.A graduate with hands-on experience in Excel, SQL, Python, and Power BI, specializing in data cleaning, exploratory data analysis, and dashboard development. Built interactive dashboards and applied machine learning techniques on real-world datasets to generate actionable business insights. Strong analytical and problem-solving skills with a keen interest in data-driven decision-making. Seeking an entry-level Data Analyst role to contribute technical expertise and business-focused insights.

WORK EXPERIENCE

Data Science Trainee

Luminar Technolab | Kochi

- Completed intensive hands-on training in Excel, SQL, Python, and Power BI
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on structured datasets
- Built supervised machine learning models for prediction-based case studies
- Applied feature engineering and model evaluation techniques
- Developed interactive dashboards to present analytical insights clearly

PROJECTS

Coffee Sales Analysis Dashboard (Excel)

- Analyzed 10,000+ transactional sales records across hour, weekday, product category, and store location
- Built an interactive Excel dashboard analyzing sales by hour, weekday, product, and store location
- Identified peak sales hours and high-performing products to improve staffing and inventory decisions
- Created KPI metrics including total revenue, average order value, and category contribution
- Improved business visibility by presenting data-driven insights using Pivot Tables and Charts

F1 Tyre Retention and Pit Stop Strategy | Python + ML + Streamlit

- Developed a machine learning model using historical F1 race and telemetry data to predict tyre degradation
- Estimated optimal pit-stop timing to improve race strategy efficiency
- Performed data cleaning, feature engineering, and model evaluation
- Deployed results in an interactive Streamlit dashboard for strategy simulation
